Visual Problems in Children

Dr. Mubashir Jalees

(Graduated from Punjab Medical College Faisalabad; MBBS, MCPS, FCPS; Fellowship in Pediatric Ophthalmology and Strabismus (Pakistan & USA); Observer Fellowship (UK); Present Working as Associate Professor (Islamabad Medical Dental College) & Consultant Pediatric Ophthalmologist in Amanat Eye Hospital)

Everyone has a vision of what children's eye problems look like: Squinting, sitting too close to the television, rubbing their eyes. Though those can be symptoms of vision issues, sometimes there are no signs your child isn't seeing well. Children will seldom complain because they think everybody else sees the way they do. In children visual problem often remain undetected and can lead to adverse effects on visual development and ocular alignment. In this talk their presentation, detection and guidelines for management will be discussed. Here's what to watch out for and what to do about it.
